

Att'y Docket: 1544.03

SPECIFICATION AMENDMENT UNDER 37 CFR 1.121(B) (1)

Please replace the paragraph on lines 16-23, page 8 of the original specification with the following replacement paragraph.

5

A *Spodoptera frugiperda* ovary cell Sf9 was used as an insect cell and cultured at a low temperature of 28 °C. The insect cell Sf9 was infected with an *autographa californica* nuclear polyhedrosis virus (AcMNPV) ~~[[pBacPAK-6]]~~ (BacPAK6) and cultured in a Grace's medium containing 10% FBS, lactalbumine, hydrolysate and antimycotic antibiotics. The insect cell was commercially available from Invitrogen Inc. (PO Box 2312, 9704CH Groningen, Netherlands). The virus, AcMNPV ~~[[pBacPAK6]]~~ (BacPAK6) was provided by Clontech laboratories Inc. (1020 East Meadow Circle, Palo Alto, C.A. 94303-4230, USA).
